- Experience in the position

**8+
YEARS***

GENERATION SUPERVISOR

- Bachelor's Degree
- On-the-job training

*Compensation averages should be used as a guide. There are numerous factors that impact actual compensation. These estimates do not include over-time, which can be a sizeable addition to base pay. Years of service and training recommendations should also be used as a guide. Company requirements vary.

Note: Some energy companies may require pre-employment testing. Please check the job requirements. These may include an EEI Pre-Employment Test or a Physical Abilities Test.

Become a Power Plant Technician

STARTING OFF AS AN ENTRY-LEVEL TECHNICIAN:

What will you do?

- Provide assistance to plant operators by reading gauges and checking equipment
- Make work area safe

What knowledge/skills/abilities will you need?

- Ability to work within a team
- Be able to lift 75 lbs
- Be able to listen and follow directions
- Be comfortable with heights
- Be able to work in noisy conditions
- Math skills including algebra, trigonometry, and geometry
- Come to work on time and prepared

TRAINING COMPONENTS:

What will you do?

- Apply Alternating Current/Direct Current concepts to daily work
- Check valves, pumps, engines/turbines
- Understand plant processes and systems (water, electric, etc.)
- Check programmable logic controls

What knowledge/skills/abilities will you need?

- Physical ability to climb stairs and ladders, operate stiff valves manually, lift weights, control pneumatic or hydraulic wrenches
- Apply knowledge obtained during training in the work environment
- Understanding of various types of test equipment including multi-meters
- Work with various types of tools
- Perform soldering

SENIOR TECHNICIAN:

What will you do?

- Diagnose and solve problems
- Manage multiple tasks at one time
- Apply basic mechanical principles (e.g., gear trains, centrifugal force, heat flow)
- Apply knowledge of systems and how they function
- Foresee system implications of malfunctions
- Anticipate required future conditions in numerous interacting systems

What knowledge/skills/abilities will you need?

- Use information to diagnose and solve problems
- Be able to manage multiple tasks at one time
- Ability to understand basic mechanical principles (e.g., gear trains, centrifugal force, heat flow)
- Ability to comprehend entire systems and how they function
- Ability to foresee system implications of malfunctions or of own actions
- Ability to anticipate required future conditions in numerous interacting systems

GENERATION SUPERVISOR:

What will you do?

- Determine schedules and work activities of team members
- Review team member performance and provide feedback
- Inspect records and log book entries to determine plant efficiency
- Prepare and manage budgets
- Communicate and report to management
- Deal with potentially stressful situations

What knowledge/skills/abilities will you need?

- People management
- Communications skills
- Financial management
- Computer skills for report preparation
- Assign priority or sequence to the steps for completing a job
- Coordinate several competing activities for efficient use of time and material
- Adapt work procedures or priorities in response to changing or unforeseen requirements or conditions

ENERGY INDUSTRY CAREERS OFFER:

- Excellent salaries
- Opportunities for advancement
- Job growth & stability
- Professional development and training
- Great benefits
